# IT Security Policy

Capulus Technologies - IT Security Policy
Version 4.2 - Effective January 1, 2024

1.0 Policy Overview
This policy establishes security requirements for all Capulus information systems, data, and network resources. Compliance is mandatory for all employees, contractors, and third parties, especially those handling smart policing and smart city data.

2.0 Access Control
2.1 User Authentication
• Strong passwords required with:
• Minimum 14 characters.
• At least 1 uppercase letter.
• At least 1 lowercase letter.
• At least 1 number.
• At least 1 special character.
• Passwords expire every 60 days.
• Cannot reuse last 12 passwords.
• Account locks after 3 failed attempts.

2.2 Multi■Factor Authentication (MFA)
MFA required for:
• All remote access.
• Administrative accounts.
• Financial systems.
• Email access from new devices.
• Access to any system containing law enforcement data.

Approved MFA methods: Microsoft Authenticator, Duo Security, hardware tokens (for executives).

2.3 Access Reviews
• Monthly: Privileged access review.
• Quarterly: Department access review.
• Immediate: Termination access removal.

3.0 Data Classification
3.1 Data Categories
Classification | Description | Examples

| ---------- | ---------- | ---------- |
Public | Non■sensitive, intended for public | Marketing materials, press releases

Internal | Business data, not for public | Internal policies, org charts

Confidential | Sensitive business data | Financial results, customer lists

Restricted | Highly sensitive, regulated | PII, trade secrets, law enforcement case data

3.2 Data Handling Requirements
Action | Public | Internal | Confidential | Restricted

| -------- | -------- | ---------- | ---------- | ---------- |
Storage | Any | Encrypted | Encrypted | Encrypted + Access Logs

Email | No restriction | Internal only | Encrypted | Not via email

Printing | Allowed | Allowed | Supervised | Prohibited

Cloud Storage | Allowed | Approved only | Prohibited | Prohibited

4.0 Network Security

4.1 Network Access
• Corporate network: WPA2■Enterprise with 802.1X.
• Guest network: Separate VLAN, internet only.
• VPN required for all remote access.
• Personal devices must use guest network.

5.0 Device Security
5.1 Endpoint Requirements
• Full disk encryption (BitLocker/FileVault).
• Anti■virus software updated daily.
• OS patches within 7 days.
• Critical security patches within 24 hours.

5.2 Mobile Devices
• Screen lock required (max 2 minutes).
• Remote wipe capability enabled.
• No jailbroken/rooted devices.
• Company data can be wiped remotely.

6.0 Incident Response
6.1 Reportable Incidents
• Suspected data breach.
• Lost/stolen device.
• Phishing click with data entry.
• Unauthorized access.
• Malware infection.

6.2 Reporting Process
1. Immediately contact IT Security: security@capulus.com
2. Call hotline: 1■888■SEC■URITY (24/7)
3. Do not power off affected systems.
4. Preserve all evidence.
5. Await security team instructions.

7.0 Policy Compliance
7.1 Violations
• First offense: Security awareness training.
• Second offense: Written warning.
• Third offense: Possible termination.
• Severe violations: Immediate termination.

7.2 Audit
• Automated compliance scanning weekly.
• Annual third■party security audit.
• Penetration testing quarterly.
